

Present Simple and Continuous discuss and agree

Choose words from below and try to agree on then write down present statements about the world using them, e.g. "The government is making lots of bad decisions" or "People in this country don't often think about the environment" if you both agree on that. You can combine words from below if you like, and negative statements are also OK. You will get one point for each statement that another group agrees is true but haven't written down.
